About Us:

SuperLoads provides complete transportation solutions for complex and extreme project cargo. We have door to door international delivery capability and specialize in multimodal throughout North America; moving over-dimensional, multimodal freight, safely and efficiently.

Capabilities:

- ✓ **Full Rail Transportation:** Proper way-billing, clearance compliance, and rail equipment ordering and management. Certified LoadMasters and specialized railcar capabilities allow us to move any size cargo anywhere, anytime.
- ✓ **Specialized Trucking:** Our Goldhofers, RGNs, and Lowboys are ready to move. Our trucking network crosses borders and facilitates hard to find equipment to transport your cargo.
- ✓ **Barge Transportation:** Sea and U.S. Waterways, including tug service.
- ✓ **Full Cargo Insurance:** Covers 100% of your cargo’s value using *any* mode of transportation from any origin to any destination in the world.
- ✓ **Turn-key Trans-loading:** Lifting, rigging, engineering, trans-loading, and custom cribbing to insure safe delivery of your cargo. Impact sensors and global tracking equipment are available.
- ✓ **Project Management:** Route Surveys, Engineering, and Lifting Plans are all services we provide in-house and offer consulting services for complex projects.

Past Experience:

Governmental:

- ✓ N.A.S.A. – Insured (\$10M) transport of 3 Liquid Oxygen Tanks, 14 Water Vessels.
- ✓ United States Navy – Transportation of P.T. Boats.
- ✓ Department of Energy – Transportation of nuclear waste liners.

Commercial and Industrial:

- ✓ Komatsu Equipment – Transportation of the 2nd largest dozer manufactured.
- ✓ Ohio Caterpillar – Transportation of CAT’s largest scrapers.
- ✓ Vancouver Power – Transport of two 480,000 pound transformers via barge, rail, and truck.
- ✓ And hundreds more.

Partners and Joint Ventures:

- ✓ Beyel Brothers, Inc. – Specializing in craning, rigging, and dedicated trucking.
- ✓ CH Robinson – Seamless international trucking; 50,000 unit truck fleet specializing in large quantity loads and legal loads.
- ✓ Lloyd’s of London – Providing cargo insurance on spot freight.
- ✓ SR International Logistics, Inc. – Complete international and waterborne freight forwarding.

WELCOME TO **SUPERLOADS**

SuperLoads Solutions Team

Overview

SuperLoads, Inc. was created in the late 90's for the purpose of providing transportation solutions for specialized over-dimensional freight. Over the years SuperLoads has developed into a team of companies who by contract and/or other arrangements work together under the SuperLoads banner to provide creative solutions to both transportation and manufacturing challenges.

As noted below some of these companies are either wholly owned, or the majority is **Veteran Owned**, by a **Service Disabled, Viet Nam Era Serviceman**. From the genesis to present the explanation below will explain how the formation of the SuperLoads Solution Team, evolved as a result of finding solutions for unique challenges as follows:

The Challenge:

Find a means to transport a 650,000 pound transformer from New Orleans to the center of the Appalachian Mountains for Pennsylvania Power and Light.

The Solution:

Create a joint venture with Beyel Brothers Crane and Rigging in order to accommodate the last six mile road haul of the shipment via a 32 axle truck, with 256 tires, to carry the load.

The Challenge:

Provide a product that would meet DOE and UN specifications for a specialized nuclear waste liner for drum protection in the burial process.

The Solution:

Manufacturing Contractors, Incorporated has for the past five years satisfactorily delivered specialized 55 gallon drum liners for a DOE WIPP project at Carlsbad, NM and other locations. We have two manufacturing plants capable of producing any product made from plastic, rubber, or metal materials and one of these facilities is ISO certified.

The Challenge:

Railroads have a restricted cargo damage liability limit, by tariff, in the amount of \$25,000.00. Find a means or method to insure spot-rail-cargo on a multi-modal basis for any amount of value transported in North America and throughout the world.

The Solution:

The creation of Cargo Risk Management; SuperLoads has a cargo insurance program underwritten by Lloyds of London to insure superload cargo from any origin to any destination in the world on a multi modal basis. This program was utilized to insure three NASA shipments with the value of \$10,000,000.00 in 2009 and 2010.

Overview Continued

Page -2

The Challenge:

Create a system to expedite the engineering and fabrication of specialized rigging components for over-dimensional freight shipments.

The Solution:

Create a joint venture between SuperLoads and Daniluk Corp. for custom manufacturing processes as required and incorporate their products and services accordingly.

The Challenge:

Find a logistical solution for incorporating waterborne freight requirements into transportation projects.

The Solution:

Create a joint venture, by and between, SuperLoads and SR International Logistics, Inc., providing worldwide water born freight solutions.

The Challenge:

Find a means or method to handle all over-dimensional freight inquires for the nation's largest trucking company, CH Robinson.

The Solution:

SuperLoads-FBC, Inc. entered into a contract with CHR to respond to all inquires for over-dimensional freight for CHR. This agreement also authorized SL to utilize the 50,000 truck fleet of CHR for other freight requirements as needed.

The Challenge:

Provide a web based automated system to provide shippers with a simplistic online method to obtain quotes for specialized transportation needs.

The Solution:

The creation of SuperLoadsFX Bid Board; SuperLoads Freight Exchange is a corporation created to provide an electronic bidding process for over dimensional freight needs, www.superloadsfx.com, launch date: 8-15-2010.

In Summary

The following companies are **Service Disabled Veteran Owned Businesses:**

SuperLoads, SuperLoads-FX, SuperLoads-FBC, Cargo Risk Management and Manufacturing Contractors.

The following SuperLoads Solution Team Members are contracted with and/or joint venture partners with SuperLoads:

Beyel Brothers Crane and Rigging, CHRobinson, Daniluk Corporation, Lloyds of London, SR International Logistics

The SuperLoads Solutions Team is ready and prepared to assist you with your challenges, thank you.

TRANSPORTATION

SUPERLOADS SOLUTIONS TEAM MEMBER

SUPERLOADS

SuperLoads provides a complete turnkey shipping service for specialized over dimensional shipments. There are no geographic boundaries, whether your needs are across the continent or across the globe, we will provide you with the appropriate service and management solution to minimize your time involvement and, more importantly, your Mobilization Costs and Expenses. SuperLoads moves over dimensional cargo from any origin to any destination.

Utilizing rail service in the logistical equation for mobilizing equipment and materials is our specialty and it sets us apart from other freight related companies. Moving equipment and materials by rail saves money and fuel, helping to keep our planet green.

- SuperLoads has over a decade of experience as a specialized mobilization company transporting large & heavy machinery goods and materials.
- SuperLoads utilizes rail service in the transport logistics matrix to reduce the cost of your transportation requirements.
- SuperLoads transports across the North American continent and over seas. SuperLoads has transported equipment to Alaska, Canada, Costa Rica, Mexico, Afghanistan, Dubai and Korea.
- Although SuperLoads specializes in rail services, standard heavy haul trucking equipment services are available when required

SUPERLOADS SOLUTIONS TEAM MEMBER

SuperLoads and SR International have formed a joint venture to utilize SR International Logistics' 60 years of combined experience in logistics, procurement and expediting. SR International Logistics, Inc. retains a Federal Maritime Commission (OTI) Freight Forwarder and NVOCC license and maintains all required bonding and other financial and liability criteria. SBA HUBZone # 14270

Capabilities:

- International Freight Forwarding
- Ocean Cargo (LCL/FCL/Break bulk/HAZMAT)
- Air Cargo (Scheduled/Non Scheduled/HAZMAT)
- Barge Transportation (Sea and US Waterway)
- Cargo Surveys (International and USA)
- Ocean / Air Charter Brokers

Experience:

- EPA Superfund Clean Up – Marshall Islands – CH2M Hill (Prime Contractor)
- 82nd Airborne – Kandahar, Afghanistan – Air Charter
- Dept. of Defense – Ukraine to Iraq – APC Ocean Vessel Charter

SUPERLOADS SOLUTIONS TEAM MEMBER

SuperLoads and Beyel Brothers formed a joint partnership to move multiple over-dimensional shipments for NASA. These shipments originated in Texas and Kansas and were delivered via a multi-modal transportation plan to The NASA Stennis Space Center in Mississippi.

Capabilities

- Bare or operated crane rentals
- Regional/National availability of equipment
- Hourly, weekly, monthly or annual crane rentals
- NCCCO Certified crane operators
- Engineered Lift plans
- Emergency Services
- Project Rigging
- Marine Services – Extensive Tug, Barge, and Crane Fleet
- We have the equipment to handle all of your projects

MANUFACTURING

MANUFACTURING CONTRACTORS

Manufacturing Contractors, Incorporated is an engineering and manufacturing company that was created to design, test, and manufacture railroad rigging and lashing equipment. With the skills and desire to facilitate unique and difficult projects, Manufacturing Contractors has branched out into other markets including, but not limited to, waste disposal. Manufacturing Contractors has fulfilled, for the last five years, a contract with the Department of Energy and the Waste Isolation Pilot Plant to manufacture and supply 90 mil polyethylene nuclear waste liners for the safe and proper disposal and transportation of nuclear waste.

- In house engineering and design keeps costs low and the projects on schedule.
- Our in house freight brokerage, SuperLoads-FBC, keeps transportation costs on machines, components, and products low.
- Two manufacturing facilities with the ability to manufacture components made from metals, plastics, woods, and rubbers.
- Injection molding, rotational molding, blow molding, thermoforming, and extrusion are all available for custom plastic products.
- Injection molding, extrusion, bonding, die cutting, compression, transfer, and vacuum molding are all available for custom rubber products.
- Custom CNC machining equipment is available for precise and flawless component design.
- ISO Certification available when required.

SUPERLOADS SOLUTIONS TEAM MEMBER

THE DANILUK CORP

The Daniluk Corporation is a leading U.S. manufacturer of special machine tools for heavy industry. Our in-house engineering, machining, way grinding, and highly trained machine building technicians offer the best built special equipment and machine tools available. The Daniluk Corporation has the ability and technical expertise to design, manufacture, install, and start up equipment you need to produce your product with the highest quality, reliability, and production.

Daniluk Corporations is also one of the largest machine tool remanufacturing firms in the U.S. With over 25 years of experience in the remanufacturing industry Daniluk is the benchmark for quality in the industry. Our customer satisfaction is the highest in the industry. Our customers continue to come back year after year for additional equipment.

Core Competencies:

- Design, development, manufacturing and remanufacturing of very large special machine tools for many industries.

Past Performance:

- Precision spherical grinders capable of internal and external spheres from .1” to 30.”
- Vertical boring mills for the rail wheel industry (300 Horsepower/ 13 axis)
- Vertical turret lathes
- Horizontal boring mills
- Vertical machining centers
- Horizontal machining centers
- All types of grinders
- Large lathes with capacity of 100 feet between centers and part weight of 100,000 pounds.

SUPPORT SERVICES

SUPERLOADS SOLUTIONS TEAM MEMBER

Cargo Risk Management (CRM) was created as a solution to the challenge of shipping valuable cargo by rail. Railroads are limited in their liability to \$25,000 by Federal statute; this poses a real problem to shippers who inevitably have cargo that is worth much more. SuperLoads, partnered with Lloyd's of London, created Cargo Risk Management to provide a policy that can cover freight of any value originating in North America destined to any place in the world regardless of mode of transport.

- CRM provides an engineering analysis for each insured shipment. This not only protects the valuable cargo but insures the safety of the equipment operators involved in the project and the cargo in transit.
- CRM provides a certified LoadMaster at each shipment's origin and any trans-loading points as required by Lloyd's of London for the cargo insurance.
- CRM provides complete claims services in the event of damage.
- Since CRM's inception there have only been two damaged shipments. In both cases the damage did not exceed the \$5,000 deductible due to the pre-planning and engineering that takes place with each and every shipment

SUPERLOADS SOLUTIONS TEAM MEMBER

The SuperLoads Freight Exchange, in conjunction with SuperLoads-FBC, is a web based freight marketplace. SuperLoadsFX is designed for Shippers looking to move Over Dimensional Loads anywhere in the world at the best possible price 24 hours a day. Ideal for individual shippers, equipment manufactures & dealers, auction sites, and major corporations that require movement of heavy haul loads.

SuperLoadsFX knows freight, and we provide this leading-edge technology platform to ensure you get the best price for moving your specialized freight.

C.H. Robinson – SuperLoadsFX’s primary partnership with C.H. Robinson provides access to over 50,000 equipment units nationwide on a daily basis, insuring complete coverage of your shipping needs.

It’s Simple

- Log on to the Bid Board
- Enter your freight data
 - Origin/Destination
 - Dimensions
 - Handling Requirements
 - Ship Date

You are done! Shortly you will begin receiving quotes by e-mail for you consideration.

Please be sure to log on to www.superloadsfx.com and check things out on our launch date of August 15, 2010!
